

Aortic Stenosis and Treatment Options (With focus on Trans Aortic Valve Replacement)

Presented by: Katherine Meier, RN Valve Program Coordinator

Aortic valve stenosis — or aortic stenosis — occurs when the heart's aortic valve narrows. This narrowing prevents the valve from opening fully, which obstructs blood flow from your heart into your aorta and onward to the rest of your body.

When the aortic valve is obstructed, your heart needs to work harder to pump blood to your body. Eventually, this extra work limits the amount of blood it can pump and may weaken your heart muscle.

Come and join *Katherine* as she presents Aortic Stenosis and Treatment Options.

When: October 22, 2015

Where: Fox Army Health Center

Time: 1200 – 1300 (bring your lunch and learn)

Audience: Anyone with Arsenal access

POC: Sheila Derochemont, RN 256-955-8888 x1440
